

## Every Now and Then

**C** **F**  
Every now and then you have this way of walkin' into my mind  
**C** **F**  
With all the things we didn't say that must be left behind  
**C** **F**  
I see that pile of pills on the table you didn't wanna see  
**C** **F**  
I see that plate of something supposed to be food you didn't wanna eat  
**C**  
I see the look in your eyes that only cried  
**F**  
Why is this happening to me

**C** **F**  
Cho: And I never cried, not once  
**C**  
Just let it slide to that secret vault  
**F**  
Where I could look not touch  
**C** **F**  
I let it go, on with the show  
**C**  
It wasn't in the script, we knew it anyway  
**F**  
There was nothing left to know  
**C**  
Nothing left to know

Every now and then I think I did what you wanted me to do  
Saw your boy the other day and he's lookin' more and more like you  
I see him trying to figure out what no one can explain  
I see myself going through the same thing, when I was exactly his age  
I see me showin' him an old picture of you  
I see him laugh and run away (cho.)

Every now and then I think of how I was supposed to be the first to leave  
And how I ended up sayin' for you what I thought you would say for me  
I see you walkin' down the street the day we met, I see the all the years gone by  
I see the times we told each other everything and the times we didn't try  
I see the times I think you're here with me  
But then all I see is the sky (cho.)
